

Regulation Bulletin 2005-01 Canada

This bulletin is a precision of the section 18.10 (FR125 Max) and 20.4 (RM1) of the 2005 Technical Regulation of the Rotax Max Challenge for the position of the welded socket for exhaust temperature measurement

Section 18.10. (FR125 Max engines)

A welded on socket (for exhaust temperature measurement) on top of the exhaust in position 50 mm from the flange of the exhaust is allowed.

Section 20.4 (RM1)

A welded on socket (for exhaust temperature measurement) on top of the exhaust in position 50 mm from the flange of the exhaust is allowed.

The word "flange" means the beginning of the pipe as shown on the drawing below
